

ROSE VOLLMER

The right bra care

Today most bras are made of modern materials which are comfortable against the skin and easy to care for.

In general you can wash all bras, including under-wired, in the washing machine. We recommend using a wash bag every time. This wash bag protects your bra from zips or other accessories and it also protects your washing machine against any lost wire. Use a gentle washing powder but no softener! because it damages the elasticity of the fabrics. Never put bras into a tumble dryer. Please follow the care instructions and the manufacturer's special recommendations. With the right care you can enjoy your bra for a long time.
